---

September 2018

Dear Fairfield Ludlowe Parent,

You are receiving this letter because your child will be taking an independent study Health class this year as a result of a scheduling conflict that prohibits your child from enrolling in the block of Health and PE assigned to their grade level. In order for your child to fulfill the Health requirement for graduation and engage with this important curriculum, we are offering an alternative to the traditional schedule for the 2018-2019 school year: students with this schedule conflict will be enrolled in an independent study Health class, which will be implemented by one of our certified health teachers.

In the independent study, the teacher will implement the curriculum that is associated with the student's grade level. Their grade level will determine which term the independent study class will occur. Below is the schedule for when the grade level specific independent studies will occur. The independent study health class will appear on the bottom of your child's schedule in the X period during the assigned term.

Term 3: Grade 10 & 11

Term 4: Grade 12

The teacher assigned to implement the independent study health class will contact your child as it gets closer to the beginning of their grade level assigned term. Health teachers will be available to assist students with the completion of course work, if needed.

Sincerely,

Vanessa
