

9-4-18

Notice to parents: we have a need to hire full-time paraprofessionals who work with some of our students with special needs. It is incredibly rewarding work. The full time positions come with full benefits, but we also frequently have the need for substitutes if you are looking for an occasional opportunity to work in the school. If you know someone certified to teach in special education, there is also a high school opening for a part time position (every other day for half a day). For any of these positions, please contact Webster Housemaster Jodi Kostbar at jkostbar@fairfieldschools.org or at 255-7236.

HEAT UPDATE:

As you know, it is extremely challenging for learning and teaching to take place in some of our non-air conditioned classrooms during this heat wave. Approximately one-third of our classrooms and some of our larger common areas have A/C, and we have been trying to coordinate the relocation of hot rooms to these locations whenever they are available. We encourage students and staff to stay hydrated and keep physical activity to a minimum. So far, the students have been extremely cooperative despite the difficult conditions. As always, if your child is complaining about feeling sick while in school, have them request to go to the Health Office. We appreciate your patience and look forward to the fall weather kicking in.
