

Convert each improper fraction into a mixed number.

$$\frac{17}{5}$$

$$3 \frac{2}{5}$$

$$3 \frac{2}{5}$$

1) First divide the numerator by the denominator.

2) The 3 is your whole number. While the remainder become the numerator.

3) Your denominator stays the same. And now you have your mixed number.

$$17 \div 5 = 3 \text{ r}2$$

Answers
