Wednesday Week 25

Ice-Cream Parlor

The most popular treat at the ice-cream parlor is the double-scoop cone. If a chocolate scoop on top of a strawberry scoop is the same cone as strawberry on top of chocolate, how many different double-scoop cones can be made with six flavors of ice cream? (Remember, someone could have two scoops of one flavor of ice cream.)

Thursday Week 25

Ice-Cream Parlor

Doris's bill at the ice-cream parlor comes to \$2.54. She realizes that she doesn't have any dollar bills, so she is paying with coins. She has 24 coins including quarters, dimes, nickels, and pennies. She has the same number of nickels as quarters and twice as many dimes as quarters. If she has 5 nickels, how many quarters, dimes, and pennies does she have?
