

Beat The Teach- Addition

Materials

Game board

Different color counters

Number of Players

2 or more

Object of the Game

Get three color counters in a row

Description

- Player 1 places two counters on two numbers on the number strip at the top of the game board.
- Player 1 then places his/her counter (team color) on the sum found on the game board. It is now player 2's turn.
- Player 2 moves only one counter on the number strip to a different number make a new sum. Player 2 places her/his (team color) on the sum found on the game board.
- Players take turns until one player has three counters in a row, column, or diagonally.
- The counters on the number strip can be placed on top of each other.
Example: $2+2 = 4$ Or, players may opt to keep the same addends as the previous player and not move any counters on the number strip and use the same sum found elsewhere on the game board.
