Computers

Teacher:
Mrs. Wilson

Class:
Computer Generated Graphics and Web Page Design

Computers

Graphic Designers

Students develop web pages that are published on the web.

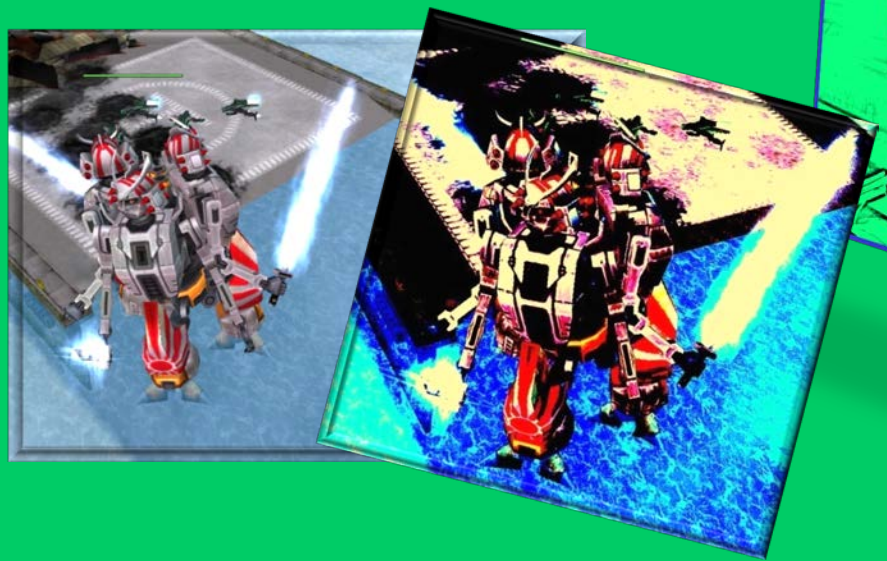
Students design and layout printed advertisements.

Students create and transform graphics, text, animations, and audio and video files.

Computers

Transform Pictures

With this capability it is possible to change how people look, apply effects and morph pictures into something new!

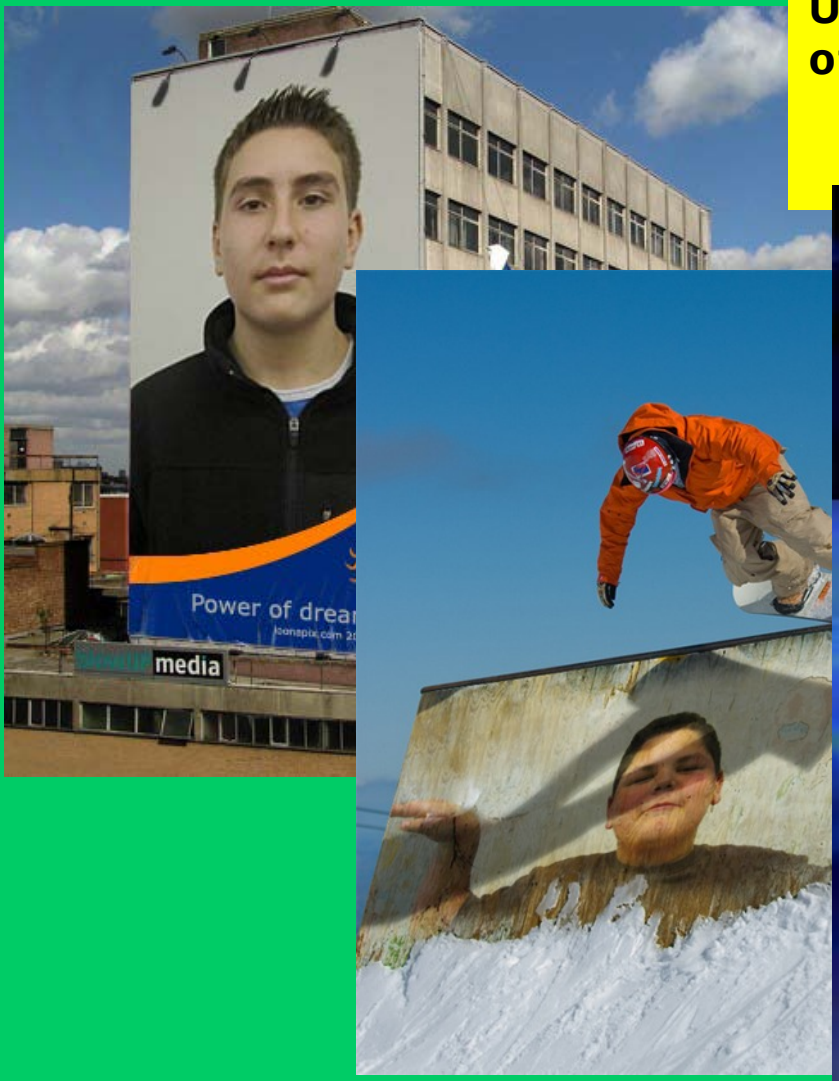


Modify Images

Computers

Use photo-editing tools to change a portion of a photograph and

see yourself all over the place!



Modify images

Computers

Can You Believe Everything You See?

Computers

How about …

Making your friends the
New Cover Girls for Vogue?

Computers

Mix it all UP!

Computers

Create EYE-Catching **Advertisements**

Graphics designers use special effects

Computers

Animations

Students create animations.

Computers

Animations

Students create animations.

Computers

Create podcasts

- Record your story with Audacity
- Record background music

News

- Edit pictures to illustrate your story
- Publish it to the web

let’s see some examples...

Computers

podcasts

Real or Fake?

Computers

News Flash !!

podcasts

Illustrate Bizarre Stories

SPECIAL EFFECTS

Computers Web activities

Have you……

- Posted your creations on Class webpages?
- Created a Voki lately?
- Used a WIDGET?
- How about creating your own website?

Computers

Students **post their creations on the Internet** on our class **WEB** pages. They upload their **podcasts**, **animations** and **movie files**.
